Editorial Objectives
Asian Journal of Applied Science and Engineering is an international, double blind peer-reviewed journal indexed in Google Scholar, PBN, and OAI supported BASE, World Cat, and abeGATE. It is Index Copernicus, and EJB listed RoMEO blue journal devoted to research in the broad field of applied sciences and engineering disciplines in academic, government, corporate, scientific and commercial contexts. Within this broad framework the journal seeks to provide a forum for experts. This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

The Journal aims to publish original work of importance in any field of applied and theoretical sciences (the areas are not limited to): Biology, Physics, Chemistry, Pharmacy, Zoology, Health sciences, Agriculture and Forestry, Environmental sciences, Mathematics, Statistics, Animal Science, Bio Technology, Medical Sciences, Geology, Social Sciences, Natural sciences, Political Science, Urban Development, Information Technology, e-Learning, e-Commerce, Architecture, Earth Science, Archaeological Science, Engineering, Industrial research, Computer Science, Electrical Engineering, Civil Engineering, Chemical Engineering, Mechanical Engineering, Petrol & Fuel Engineering, Material Engineering, Textile Engineering, Lather Engineering, Glass & Ceramics, Aeronautic Engineering, Space Engineering. It invites full research and conceptual papers (up to 6,000 words) in these fields, as well as shorter research notes (under 3000 words).

The journal registered in the ISSN Register (the world catalogue of serials and continuing resources, taken from the ISO standard 3297 which defines the ISSN and its uses). Articles in this journal have undergone a rigorous blind peer review system, based on initial editor screening and involving in-country and international refereeing, ensures that articles meet the highest standards of quality.

Submissions
Prospective authors should ensure their papers meet the journal scope and must adhere to the author guidelines. Every submission must spell out the implications of findings in the paper (these should be mentioned in the introduction, objectives, and research methodology, discussion and conclusion sections of your paper.) Papers which focus on findings for specific sectors without adequate attention to the objectives of the study will not be accepted.

In general only research-based submissions will be considered. Such submissions may be any type of research, including technical or conceptual.

There are several types of submissions that AJASE generally rejects:
• Viewpoints, literature reviews or general reviews of a field or topic
• Papers that require mathematics to develop, test or analyze concepts or findings (these require non-mathematical explanations for the readership of AJASE)
• Questionnaire-based studies based on convenience samples that expand previous studies only moderately (these should focus on a new topic, and argue convincingly that convenience sampling is necessary, to be acceptable)
• TAM or other standard model-based submissions applied in a formulaic way to a limited population and which do not significantly advance our knowledge of the topic

Review process
Each paper is reviewed by the editor and, if it is judged suitable for this publication, it is then sent to at least two independent referees for double blind peer review. Based on their recommendation, as well as consultation between relevant Editorial Board members the editor then decides whether the paper should be accepted as is, revised or rejected. The editor may make use of Grammarly and Paperrater software for checking the originality of submissions received.
